	- management sessions with male and female inpatient inmates. - Supervisor: Deborah Goldsmith, Ph.D.
Undergraduate Training Experience	Sept 1998-Dec 1998 <u>Roy Mass Youth Alternative School</u> San Antonio, Texas Undergraduate Student Undergraduate Internship 300-Hours - Worked with children and adolescents who had permanently been placed at RMYAS by Child Protective Agencies, Department of Protective and Regulatory Services, Bear County Juvenile Detention, and self-referrals. Daily activities included reporting daily logs, participating in group therapy, distribution of daily medication, checking chores, making bed checks, totaling each child's points and marks, and helping the children with their homework or other problems they may have been experiencing. Sept 1998-Dec 1998 <u>Parent/Child Incorporated and Head Start</u> San Antonio, Texas Undergraduate Student Undergraduate Practicum - Worked at Parent/Child Inc as part of undergraduate concentration in Health. Parent/Child Inc. is a government agency designed to help clients obtain free daycare and medical supervision for their children. Volunteered in the early head start division; including recruitment of pregnant teenagers for the early head start program, assessment of the client's standing and participation in the program, conducted house calls with Supervisor to inspect the environment the infant was living in as well as screening the infant for neurological disease and other early childhood diseases. Visited many of the daycare sites to inspect the conditions of each and make sure they met government regulation. Checked each site's weekly planner to indicate that adequate learning activities were implemented.
Supervisory & Teaching Experience	July 2011-Sept 2012 <u>Comprehensive MedPsych Systems</u> Tampa, Florida - Supervisor for the pre-doctoral practicum and internship program in neuropsychology. - Supervised master's level therapists. Aug 2010-July 2011 <u>Tampa General Hospital</u> Tampa, Florida - Supervisor for the postdoctoral fellowship program in pediatric neuropsychology.
